

# SAFETY DATA SHEET

## Lanotec Lanolin Based Release Agent Mix

Infosafe No.: 5GEY1  
ISSUED Date : 16/09/2022  
ISSUED by: Australian Chemical Services

### Section 1 - Identification

**Product Identifier**

Lanotec Lanolin Based Release Agent Mix

**Product Code**

LAN001501

**Company Name**

Lanotec Australia Pty Ltd (ABN 87 096 795 621)

**Address**

Unit 79  
57-101 Balham Road Archerfield  
QLD 4108 Australia

**Telephone/Fax Number**

Tel: +61 7 3373 3700  
Fax: +61 7 3373 3777

**Emergency Phone Number**

0417 638 004

**Recommended use of the chemical and restrictions on use**

Industrial form release agent, ready to use

### Section 2 - Hazard(s) Identification

**GHS classification of the substance/mixture**

Not classified as Hazardous according to the Globally Harmonised System of Classification and Labelling of Chemicals (GHS) including Work, Health and Safety regulations, Australia.

Not classified as Dangerous Goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. (7th edition)

**Precautionary Statement – General**

P102 Keep out of reach of children.

### Section 3 - Composition and Information on Ingredients

**Ingredients**

Name	CAS	Proportion
All ingredients are classified as non-hazardous at the concentrations used according to the criteria of Safe Work Australia	Not applicable	-

## Section 4 - First Aid Measures

---

### Inhalation

If inhaled, remove from contaminated area. Apply artificial respiration if not breathing.

### Ingestion

If swallowed, do NOT induce vomiting.

### Skin

If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water

### Eye

If in eyes wash out immediately with water.

### First Aid Facilities

None specified, consider ventilation and respiratory aid.

### Advice to Doctor

Treat symptomatically.

### Other Information

For advice in an emergency, contact a Poisons Information Centre (Phone Australia 131 126) or a doctor at once.

## Section 5 - Firefighting Measures

---

### Fire Fighting Measures

Shut off product that may 'fuel' a fire if safe to do so. Allow trained personnel to attend a fire in progress providing fire fighters with this Safety Data Sheet. Prevent extinguishing media from escaping to drains and waterways.

### Suitable Extinguishing Media

Alcohol resistant foam, or dry chemical or foam.

### Hazards from Combustion Products

This product will not burn with attempted ignition.

### Specific hazards arising from the chemical

Will not burn. If main component has evaporated in extreme heat, the remainder may decompose to carbon dioxide, carbon monoxide and other organic complexes in small amounts.

## Section 6 - Accidental Release Measures

---

### Emergency Procedures

This product will not burn. It is unlikely that this product will fuel a fire in progress. For surrounding fire, cool packaging with water spray, or foam. In extreme temperatures, some organic complexes may form in small amounts.

### Clean-up Methods - Large Spillages

#### Major Land Spill

- Eliminate sources of ignition.
- Warn occupants of downwind areas of possible fire and explosion hazard, where present.
- Prevent product from entering sewers, watercourses, or low-lying areas.
- Keep the public away from the area.
- Shut off the source of the spill if possible and safe to do so.
- Advise authorities if substance has entered a watercourse or sewer or has contaminated soil or vegetation.
- Take measures to minimise the effect on the ground water.
- Contain the spilled product using the resources in the spill kit.
- Recover by pumping – use explosion proof pump or hand pump – or with a suitable absorbent material.
- Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.
- See "First Aid Measures"

#### Major Water Spill

- Eliminate any sources of ignition.
- Warn occupants and shipping in downwind areas of possible fire and explosion hazard, where present.
- Notify the port or relevant authority and keep the public away from the area.
- Shut off the source of the spill if possible and safe to do so.

- Confine the spill if possible.
- Remove the product from the surface by skimming or with suitable absorbent material.
- Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.
- See "First Aid Measures"

## Section 7 - Handling and Storage

### Precautions for Safe Handling

Store in a well-ventilated area and out of direct sunlight. The product should be shaken well before use and should not be mixed with other chemicals. This product does not require dilution: it is ready for use. It is good industrial hygiene practice to check stored packages for any leaks.

### Conditions for safe storage, including any incompatibilities

This product requires no particular storage requirements. For all industrial products, keep out of direct sunlight or away from heat sources. Product is inert and unlikely to interact with other chemicals. Will not burn.

## Section 8 - Exposure Controls and Personal Protection

### Occupational exposure limit values

The time weighted average concentration (TWA) for the liquid component of this product is: None specified; consider 5 g/m<sup>3</sup>, which means the highest allowable exposure concentration in an eight-hour day for a five-day working week. The short term exposure limit (STEL) is: None specified; consider 5 g/m<sup>3</sup>, which is the maximum allowable exposure concentration at any time. The liquid product component of this product is isolated in an aerosol device.

### Engineering Controls

The use of local exhaust ventilation is recommended to control process emissions near the source for this product when used as an aerosol. Laboratory samples should be handled in a fume hood. Provide mechanical ventilation of confined spaces. Use explosion proof equipment for any atomised products such as aerosols.

### Respiratory Protection

Where concentrations in air may approach or exceed the limits described in the National Exposure Standards, it is recommended to use a half-face filter mask to protect from overexposure by inhalation. A type 'A' filter material is considered suitable for this product.

### Eye and Face Protection

Consider using safety glasses or other eye protection

### Hand Protection

Consider wearing long sleeves, long trousers, or coveralls, and enclosed footwear or safety boots when handling this product. It is recommended to consider wearing protective gloves when handling this product.

## Section 9 - Physical and Chemical Properties

Properties	Description	Properties	Description
Form	Liquid	Appearance	Tan/Brown, milky, mobile solution
Boiling Point	> 100°C	Solubility in Water	Miscible
pH	Not determined	Vapour Pressure	Not available
Density	0.97-0.99 g/ml	Flash Point	> 150C

## Section 10 - Stability and Reactivity

### Chemical Stability

Stable under normal conditions of storage and handling.

### Conditions to Avoid

None identified

## Hazardous Decomposition Products

Extreme heat, strong oxidisers, strong acids and bases.

## Section 11 - Toxicological Information

---

### Toxicology Information

No adverse health effects expected if the product is used in accordance with this Safety Data Sheet and product label.

Oral LD50: No data; consider > 10 g/kg

Inhalation TCLo: No data; consider > 10 g/kg

### Ingestion

This product may cause discomfort on swallowing and result in gastric disturbances. Do not induce vomiting, but give water to drink. Treat symptomatically.

### Inhalation

This product may be irritating when working in confined spaces. Avoid inhaling mists of this product and do not concentrate vapours intentionally.

### Skin

This product will have an emolient effect on the skin (moisturises) and will create a barrier to other chemicals.

### Eye

This product will not be irritating to eyes, nor is there significant vapour. If the product is applied directly to the eyes, it will result in blurred vision and should be treated with first aid. There will be no permanent eye damage.

### Chronic Effects

There are no chronic health effects with use of this product.

## Section 12 - Ecological Information

---

### Ecotoxicity

Expected to be harmful to aquatic species. Do not discharge large quantities to drains, sewers or waterways.

### Persistence and degradability

Information is not available for this specific product.

### Mobility

This product is likely to be mobile on release to the environment, but does not bioaccumulate. This product is based on an animal fat and can be considered biodegradable.

### Environmental Protection

Prevent large amounts from entering waterways, drains and sewers.

### Acute Toxicity - Fish

Fish Toxicity LC50: No data; consider > 100 mg/L

### Acute Toxicity - Daphnia

Daphnia Magna EC50: No data; consider > 100 mg/L

### Acute Toxicity - Algae

Blue-green algae: No data; consider > 100 mg/L

Green algae: No data; consider > 100 mg/L

## Section 13 - Disposal Considerations

---

### Disposal Considerations

This product should be disposed in accordance with the local authority in waste management. This product is not classified as dangerous goods for transport or hazardous for workplace use.

### Special Precautions for Incineration or Landfill

This product is not suitable for disposal by either landfill or via municipal sewers, drains, natural streams or rivers. This product should be treated and disposed through chemical waste treatment in accordance with the local authority, or considered for use in recycling.

## Section 14 - Transport Information

---

### Transport Information

Not classified as a Dangerous Good according to the Australian Code for the Transport of Dangerous Goods by Road and Rail or NZS 5433:1999 Transport of Dangerous Goods on Land.

### ADG U.N. Number

None Allocated

### ADG Proper Shipping Name

None Allocated

### ADG Transport Hazard Class

None Allocated

## Section 15 - Regulatory Information

---

### Regulatory Information

Not classified as Hazardous according to the Globally Harmonised System of classification and labelling of chemicals (GHS) including Work, Health and Safety regulations, Australia

### Poisons Schedule

N/A

### Australia (AICS/AIIC)

All ingredients listed.

## Section 16 - Any Other Relevant Information

---

### Date of Preparation

SDS reviewed: September 2022 (No changes)

Review date: September 2027

Supersedes: November 2017

### Literature References

Preparation of Safety Data Sheets for Hazardous Chemicals Code of Practice.

Standard for the Uniform Scheduling of Medicines and Poisons.

Australian Code for the Transport of Dangerous Goods by Road & Rail.

Globally Harmonised System of classification and labelling of chemicals.

Suppliers SDS.

### Other Information

Controlled Document: LAN-0010 SDS-RAM

Emergency Number: 0417 638 004

DO NOT MIX WITH OTHER CHEMICALS WITHOUT PRIOR CONSULTATION WITH THE MANUFACTURER. Always use product as directed. Never return any unused material to original drum.

The information sourced for the preparation of this document was correct and complete at the time of writing to the best of the writer's knowledge. The document represents the commitment to the company's responsibilities surrounding the supply of this product, undertaken in good faith. This document should be taken as a safety guide for the product and its recommended uses, but is in no way an absolute authority. Please consult the relevant legislation and regulations governing the use and storage of this type of product. For further information, please contact Lanotec Australia Pty Ltd.
