

# SAFETY DATA SHEET

## Wire Rope Lube

Infosafe No.: 5GEX1  
ISSUED Date : 23/09/2022  
ISSUED by: Australian Chemical Services

### Section 1 - Identification

**Product Identifier**

Wire Rope Lube

**Company Name**

Lanotec Australia Pty Ltd (ABN 87 096 795 621)

**Address**

Unit 79  
57-101 Balham Road Archerfield  
QLD 4108 Australia

**Telephone/Fax Number**

Tel: +61 7 3373 3700

Fax: +61 7 3373 3777

**Emergency Phone Number**

0417 638 004

**Recommended use of the chemical and restrictions on use**

Wire rope lubricant and corrosion protection.

**Additional Information**

NZ Contact: Steelmasters, 79-81 O'Rorke Road, Penrose, 1061, Auckland, New Zealand.

NZ Emergency Contact: P 09 5798196, M 021757581

### Section 2 - Hazard(s) Identification

**GHS classification of the substance/mixture**

Not classified as Hazardous according to the Globally Harmonised System of Classification and Labelling of Chemicals (GHS) including Work, Health and Safety regulations, Australia.

Not classified as Dangerous Goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. (7th edition)

**Precautionary Statement – General**

P102 Keep out of reach of children.

### Section 3 - Composition and Information on Ingredients

**Ingredients**

Name	CAS	Proportion
Non hazardous component(s) to 100%		-

### Section 4 - First Aid Measures

**Inhalation**

If inhaled, remove from contaminated area. Apply artificial respiration if not breathing.

**Ingestion**

If swallowed, do NOT induce vomiting.

**Skin**

If skin or hair contact occurs, remove contaminated clothing and flush skin or hair with running water.

**Eye**

If in eyes wash out immediately with water.

**First Aid Facilities**

None specified, consider ventilation and respiratory aid.

**Advice to Doctor**

Treat symptomatically.

**Other Information**

For advice in an emergency, contact a Poisons Information Centre (Phone Australia 131 126) or a doctor at once.

## Section 5 - Firefighting Measures

---

**Fire Fighting Measures**

Shut off product that may 'fuel' a fire if safe to do so. Allow trained personnel to attend a fire in progress providing fire fighters with this Safety Data Sheet. Prevent extinguishing media from escaping to drains and waterways.

**Suitable Extinguishing Media**

Alcohol resistant foam, or dry chemical or foam.

**Hazards from Combustion Products**

This product is combustible and will fuel a fire in progress.

**Specific hazards arising from the chemical**

Hazardous decomposition: Carbon dioxide, carbon monoxide and other organic complexes upon incomplete burning or oxidation.

**Other Information**

Combustible liquid.

## Section 6 - Accidental Release Measures

---

**Emergency Procedures**

This product is combustible and will fuel a fire in progress. Observe standard operating procedures for managing a blaze involving chemicals which can emit toxic vapours. There are chemical reactions that can take place through hydrolysis (reactions with water vapour) creating corrosive mixtures, and vapour hazards. Heat and flame will accelerate the oxidation process which can result in hazardous decomposition mixtures: carbon dioxide and carbon monoxide. Ensure the extinguishing media and any fire-fighting run-off is contained from contributing to environmental contamination, other chemical reaction hazards in adjacent areas, or expansion of the fire-affected area.

**Clean-up Methods - Large Spillages****Major Land Spill**

- Eliminate sources of ignition.
- Warn occupants of downwind areas of possible fire and explosion hazard, where present.
- Prevent product from entering sewers, watercourses, or low-lying areas.
- Keep the public away from the area.
- Shut off the source of the spill if possible and safe to do so.
- Advise authorities if substance has entered a watercourse or sewer or has contaminated soil or vegetation.
- Take measures to minimise the effect on the ground water.
- Contain the spilled product using the resources in the spill kit.
- Recover by pumping – use explosion proof pump or hand pump – or with a suitable absorbent material.
- Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.
- See “First Aid Measures”

**Major Water Spill**

- Eliminate any sources of ignition.
- Warn occupants and shipping in downwind areas of possible fire and explosion hazard, where present.
- Notify the port or relevant authority and keep the public away from the area.
- Shut off the source of the spill if possible and safe to do so.

- Confine the spill if possible.
- Remove the product from the surface by skimming or with suitable absorbent material.
- Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.
- See “First Aid Measures”

## Section 7 - Handling and Storage

### Precautions for Safe Handling

Store in a well-ventilated area away from incompatible materials such as strong acids and bases and strong oxidising materials. Check containers for integrity periodically and vent containers in hot weather. Employ good industrial hygiene when using this product, i.e. wash hands before and after use.

### Conditions for safe storage, including any incompatibilities

This product is combustible and will fuel a fire in progress. Avoid extreme heat, direct sunlight, naked flames and ignition sources. Store any chemicals in banded or designated areas. Take precautions against static discharge.

### Storage Regulations

C1 Combustible Liquid

## Section 8 - Exposure Controls and Personal Protection

### Occupational exposure limit values

The time weighted average concentration (TWA) for the liquid component of this product is: None specified; consider 5 g/m<sup>3</sup>, which means the highest allowable exposure concentration in an eight-hour day for a five-day working week.

The short term exposure limit (STEL) is: None specified; consider 5 g/m<sup>3</sup>, which is the maximum allowable exposure concentration at any time.

### Engineering Controls

The use of local exhaust ventilation is recommended to control process emissions near the source for this product when used as a aerosol. Laboratory samples should be handled in a fume hood. Provide mechanical ventilation of confined spaces. Use explosion proof equipment for any atomised products such as aerosols.

### Respiratory Protection

If risk of inhalation of spray mist exists, wear combined organic vapour/particulate respirator. If using a respirator' ensure that the cartridges are correct for the potential air contamination and are in good working order.

### Eye and Face Protection

Consider using safety glasses or other eye protection

### Personal Protective Equipment

Consider wearing long sleeves, long trousers, or coveralls, and enclosed footwear or safety boots when handling this product. It is recommended to consider wearing protective gloves when handling this product.

## Section 9 - Physical and Chemical Properties

Properties	Description	Properties	Description
Form	Liquid	Appearance	Brown, viscous liquid
Boiling Point	> 150°C	Solubility in Water	Immiscible
pH	Not determined	Vapour Pressure	Not available
Viscosity	65-75 cSt @ 25°C	Volatile Component	ca. 5%
Density	0.85-0.87 g/ml	Flash Point	> 95°C
Auto-Ignition Temperature	> 350°C		

## Section 10 - Stability and Reactivity

### Chemical Stability

Stable under normal conditions of storage and handling.

### Conditions to Avoid

Combustible liquid. Avoid excessive heat, sparks and naked flames.

### Incompatible Materials

May be incompatible with strong oxidising agents.

### Hazardous Decomposition Products

Strong acids, bases and oxidisers, heat and ignition sources.

## Section 11 - Toxicological Information

---

### Toxicology Information

No adverse health effects expected if the product is used in accordance with this Safety Data Sheet and product label.

Oral LD50: No data; consider > 10 g/kg

Inhalation TCLO: No data; consider > 10 g/kg

### Ingestion

This product may cause discomfort on swallowing and result in gastric disturbances. Do not induce vomiting, but give water to drink.

### Inhalation

This product is unlikely to be inhaled and produces no significant smells or vapours.

### Skin

This product will have an emolient effect on the skin (moisturises) and will create a barrier to other chemicals.

### Eye

This product will not be irritating to eyes, nor is there significant vapour. If the product is applied directly to the eyes, it will result in blurred vision and should be treated with first aid. There will be no permanent eye damage.

### Chronic Effects

There are no chronic health effects with use of this product.

## Section 12 - Ecological Information

---

### Persistence and degradability

Information is not available for this specific product.

### Mobility

This product is unlikely to be mobile on release to the environment and does not bioaccumulate. This product contains an animal fat that is considered biodegradable.

### Environmental Protection

Prevent large amounts from entering waterways, drains and sewers.

### Acute Toxicity - Fish

Fish Toxicity LC50: No data; consider > 100 mg/L

### Acute Toxicity - Daphnia

Daphnia Magna EC50: No data; consider > 100 mg/L

### Acute Toxicity - Algae

Blue-green algae: No data; consider > 100 mg/L

Green algae: No data; consider > 100 mg/L

## Section 13 - Disposal Considerations

---

### Disposal Considerations

This product must be disposed in accordance with the local authority in chemical waste management.

### Special Precautions for Incineration or Landfill

This product is not suitable for disposal by either landfill or via municipal sewers, drains, natural streams or rivers. This product should be treated and disposed through chemical waste treatment in accordance with the local authority, or considered for use in recycling.

## Section 14 - Transport Information

---

### Transport Information

Where this material is stored, handled and used below its flashpoint it is not classified as a Dangerous Good according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. However, the material is classified as a Class C1 Combustible Liquid according to AS1940.

### ADG U.N. Number

None Allocated

### ADG Proper Shipping Name

None Allocated

### ADG Transport Hazard Class

None Allocated

## Section 15 - Regulatory Information

---

### Regulatory Information

Not classified as Hazardous according to the Globally Harmonised System of classification and labelling of chemicals (GHS) including Work, Health and Safety regulations, Australia

### Poisons Schedule

S5

### HSNO Approval Number

Non hazardous

### Australia (AICS/AIIC)

All ingredients listed.

### Global Inventory Status

## Section 16 - Any Other Relevant Information

---

### Date of Preparation

SDS reviewed: September 2022

Review date: September 2027

Supersedes: June 2018

### Literature References

Preparation of Safety Data Sheets for Hazardous Chemicals Code of Practice.

Standard for the Uniform Scheduling of Medicines and Poisons.

Australian Code for the Transport of Dangerous Goods by Road & Rail.

Globally Harmonised System of classification and labelling of chemicals.

Suppliers SDS.

### Other Information

Controlled Document: LAN-0010 SDS-WRL

Emergency Number: 0417 638 004

DO NOT MIX WITH OTHER CHEMICALS WITHOUT PRIOR CONSULTATION WITH THE MANUFACTURER. Always use product as directed. Never return any unused material to original drum.

The information sourced for the preparation of this document was correct and complete at the time of writing to the best of the writer's knowledge. The document represents the commitment to the company's responsibilities surrounding the supply of this product, undertaken in good faith. This document should be taken as a safety guide for the product and its recommended uses, but is in no way an absolute authority. Please consult the relevant legislation and regulations governing the use and storage of this type of product. For further information, please contact Lanotec Australia Pty Ltd.
